Agriculture

Environmental

- Chemical optimization for pollution reduction
- Field CO2 emission reduction
- Predictive soil-mix analysis
- Strategic workforce analysis
- Predictive field characteristic analysis
- Water usage reduction

Yield

- Predictive field / product analytics
- Predictive weather modeling
- Predictive maintenance on machinery & equipment
- Predictive maintenance on manufacturing equipment – reducing down times
- Real time data decision making vs predetermined scheduling
- Predictive asset utilization scheduling
- Competitive intelligence

Distribution

- Logistic optimization to maximize yield / reduce waster
- Predictive weather modeling
- Temperature / climate decision making optimization
- Seasonality workforce scheduling
